

# SAFPWR BATTERY CASE- CASE AND RECHARGEABLE BATTERY FOR IPHONE 3G AND 3GS

The [SaFPWR](#) iPhone Battery Case is the must have cell phone accessory for every smart phone owner. The [SaFPWR](#) iPhone Battery Case is a rechargeable external battery and stylish case for the iPhone 3G and iPhone 3GS. The [SaFPWR](#) Battery Extender Case is officially certified by Apple and has been stamped with the "Works with iPhone" logo.

If you are like most iPhone users, you can rely on your phone to give you directions, store your music, surf the internet, keep you connected, and just about everything else, but the only thing you can't rely on is your battery power to keep you connected when you're away from your charger. [SaFPWR's](#) revolutionary battery extender is designed to double your battery time so you always have time to talk and connect even when you're on the go.

With the [SaFPWR](#) iPhone Battery Case you can use your iPhone 3G/3GS anywhere you go without worrying about the limits of its battery life. Imagine being able to travel without having to search for an electrical outlet or car adapter, you will never again have to limit your e-mails, tweets, texts, or calls when you have [SaFPWR](#). In fact, with this new innovative technology you can experience up to two days or more of phone time with your iPhone Battery Case.

The iPhone Battery Case utilizes an intelligent battery that uses the revolutionary new power management system designed to increase your battery run time by 200 percent or more. The [SaFPWR](#) system communicates directly with your iPhone 3G/3GS to determine exactly how much power your phone needs to prevent any overcharging, overheating, and short circuiting. This communication system is what makes the [SaFPWR](#) iPhone Battery Case different and more efficient than all other battery-extender products on the market.

## IPHONE BATTERY EXTENDER AND CASE FEATURES:

- **Increased run times of up to 200 percent or more-** Our lithium polymer batteries can provide up to more than twice the energy of comparable batteries of the same capacity, size and shape.
- **Safe operation-** Our technology prevents short-circuit, overcharge, over-discharge and malfunction to protect you and your smart phone.
- **Efficient power use-** [SaFPWR](#) batteries maximize the energy available to your device while minimizing wasted power.
- **Advanced design-** [SaFPWR](#) offers the benefits of a lithium polymer battery (slim design, high capacity, no memory effect) without overheating and other risks associated with battery usage.
- **Customized Look-** An array of different colors, textures, and looks to keep your smart phone stylish and safe

Your SmartPhone just got a *life*.
